DESCRIPTION

Short description	"Located inside the bull ring, this museum lets visitors discover the oldest and most recognised bullfighting arenas in the world. They will learn not only the origin of the bull ring in Almadén, built in the middle of the 18th century, but also its construction details, the use of rafters and clay or the arches used by the master builders who built it. With the help of interpretive and audiovisual panels, bullfighting is recapped at a general level, from its origins to the present, as photographs, costumes and tools used in the different bullfighting events are displayed. A prominent place in the museum is occupied by the history of local bullfighting, represented by bullfighters such as Rafael Martín “El Zorro”, Teodoro Muñoz and Pedro Velázquez."
