Original use	The “trigl” was initially wooden and later metal. Along with the “krutca”, it served for collecting the ore from the ground and pouring it into the “trugca” pit cart. Ten to twelve trigls were required to fill the “trugca” pit cart (300 kg). It was also used for throwing the packing material – pit tailings, burned ore, gravel or sand. After the excavation ended, the pit shafts needed to be filled with material.
Present use	The described object is being preserved, secured and presented as an important monument of Idrija mining heritage with exceptional universal values. It is a part of the mining collection of the Idrija Municipal Museum. It is stored in the depot. It may be used for temporary museum exhibitions and various forms of promotion of mercury heritage.
Original location	The Pit of the Idrija Mercury Mine.
Present location	Idrija Municipal Museum, Prelovčeva 2 depot.

STATE OF CONSERVATION

History of conservation:	The described object was conserved before 1995. Therefore, no additional interventions are necessary. Security of the premises is ensured.
Present state	good
Necessary activities:	Regular seasonal maintenance.
